Dr. Zeng-Fu Xu

Increasing Seed Yield in Biofuel Plant *Jatropha curcas*: Manipulating Floral Development and Sex Expression with phytohormones

**Tuesday, August 9, 2016
Noon in Room 473, Moore Hall**

Dr. Zeng-Fu Xu is a Professor and Director of the Key Laboratory of Tropical Plant Resources and Sustainable Use, Xishuangbanna Tropical Botanical Garden, Chinese Academy of Sciences, China. His lab focuses on increasing the yield potential of two woody oil plants *Jatropha curcas* and *Plukenetia volubilis* through manipulating floral development and sex expression.

If you need more information about Dr. Xu, please contact: Dr. Yiqun Weng, Horticulture Department, 262-0028, or yiqun.weng@wisc.edu.
