One Postdoctoral Position in Plant Epigenetics
Xuehua Zhong Lab
University of Wisconsin-Madison

One postdoctoral position is immediately available to study plant epigenetics in the laboratory of Xuehua Zhong in the Department of Genetics & Wisconsin Institute for Discovery at University of Wisconsin-Madison. The Zhong lab is interested in the function and mechanism of epigenetic modifications in genome regulation, development, and environmental adaptation by combining functional genomics, high-throughput proteomics, and genomics techniques together with traditional genetic and biochemical approaches. For more background information on these research topics, please visit [http://zhonglab.genetics.wisc.edu](http://zhonglab.genetics.wisc.edu).

Highly motivated individuals with strong background in plant genetics, biochemistry, and computational biology and a record of scientific productivity are encouraged to apply. Candidates with their PhD degrees within 1-2 years and a minimum of one first-authored publication from their PhD work are required. Excellent oral and written communication skills and the ability to work well in a collaborative research environment are essential. A competitive salary, fringe benefits including health insurance, and travel support to meetings are available. Funding is for at least 2 years with additional years possible based on performance.

Please send a CV, a cover letter summarizing research experience and future research goals, and names and contact information for 3 academic references to Dr. Xuehua Zhong (xuehua.zhong@wisc.edu). Applications will be accepted until suitable candidates are hired.

The Zhong lab strives to maintain an inclusive environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, and national origin.
